		Blinking	Wireless open

Button Explanation

PAIR/RST: When the button is pressed for 1-2 seconds, the device enters the pairing state. When the button is pressed for 5-8 seconds, the device releases the pairing state and the WiFi Repeater restore the factory settings. When the button is pressed for more than 10 seconds, the Powerline Adapter restore the factory settings.

Quick Setup AP Mode

- 1
- Connect the powerline adapter to an available LAN port of the router.
- 2
- Plug in the PL01A and PL01B in the same room. Wait for about 20 seconds until the PL01B's Wi-Fi LED turns on.

- 3
- Pair the powerline devices.
a.Press the Pair button on the PL01A for 1 second. The SYS LED **sys** starts blinking.
Note: If the SYS LED **sys does not blink, press it again.**
b.Within two minutes, press the Pair button on the PL01B for 1 second.The SYS LED **sys** starts blinking. When the Powerline LED turns solid, the pairing process is complete.

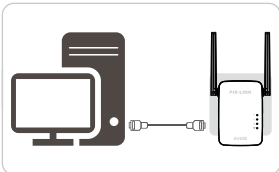

- 4
- Configure the WiFi SSID(network name) and password.

a. Connect to the PL01B

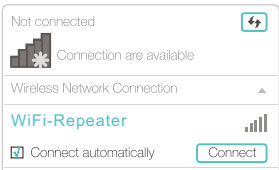

For Wired

Disable the Wi-Fi on your computer. Connect your computer to the PL01B via an Ethernet cable.

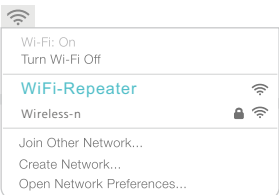

For Windows Users

Disconnect your Ethernet (wired) connection from your computer.Click the Wi-Fi icon on the taskbar and connect to the Repeater's network (e.g. **WiFi-Repeater**).

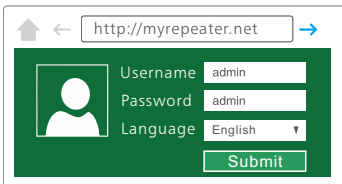

For Mac OS X Users

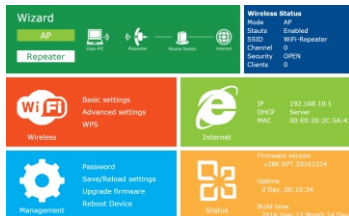

Disconnect the Ethernet (wired) connection from your computer (if any). Click the Wi-Fi icon in the top right corner of the screen, and connect to the Repeater's network (e.g. **WiFi-Repeater**).

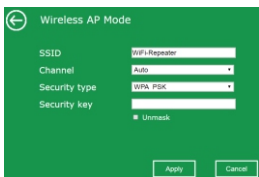

b.Launch a web browser and type <http://myrepeater.net> or <http://192.168.10.1> in the address field. Enter admin (all lowercase) for both Username and Password, then click **Submit**.

c.After logging in, you will see the web page below:
Click on **"AP"** to continue.

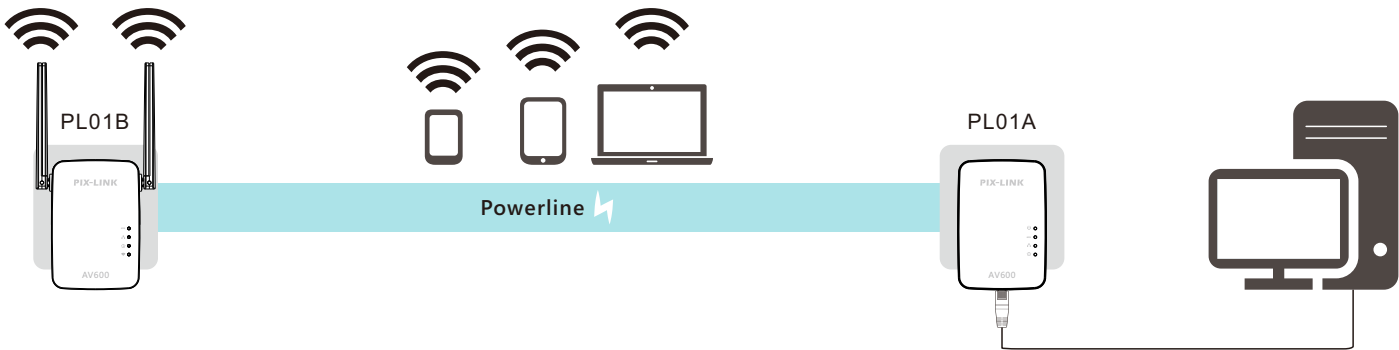

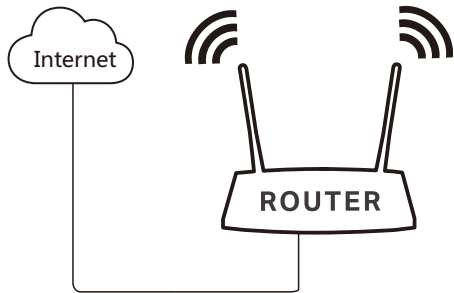

d.Change the SSID and Password,Click on **"Apply"** button, The WiFi Repeater will restart.

SSID	SSID of the WiFi Extender
Channel	Auto (recommend)
Security type	Setup the wireless security and encryption to prevent from unauthorized access and monitoring. Supports WEP,WPA,WPA2, WPA/WPA2 encryption methods.
Security Key	The "password" of the WiFi Extender

e.After the PL01B reboot has been completed, You can Surf the Internet with the Powerline devices.

Quick Setup Repeater Mode

1 Plug in the PL01A and PL01B in the same room. Wait for about 20 seconds until the PL01B's Wi-Fi LED  turns on.

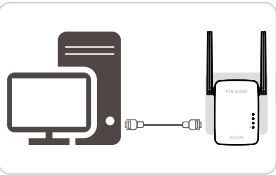

2 Pair the powerline devices.
a. Press the Pair button on the PL01A for 1 second. The SYS LED **sys** starts blinking.
Note: If the SYS LED **sys does not blink, press it again.**
b. Within two minutes, press the Pair button on the PL01B for 1 second. The SYS LED **sys** starts blinking. When the Powerline LED  turns solid, the pairing process is complete.

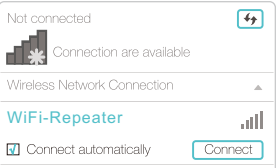

3 Configure the WiFi SSID(network name) and password.

a. Connect to the PL01B

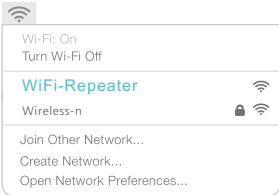

For Wired
Disable the Wi-Fi on your computer. Connect your computer to the Repeater via an Ethernet cable.

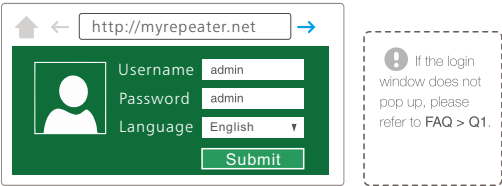

For Windows Users
Disconnect your Ethernet (wired) connection from your computer. Click the Wi-Fi icon on the taskbar and connect to the Repeater's network (e.g. **WiFi-Repeater**).

For Mac OS X Users
Disconnect the Ethernet (wired) connection from your computer (if any). Click the Wi-Fi icon in the top right corner of the screen, and connect to the Repeater's network (e.g. **WiFi-Repeater**).

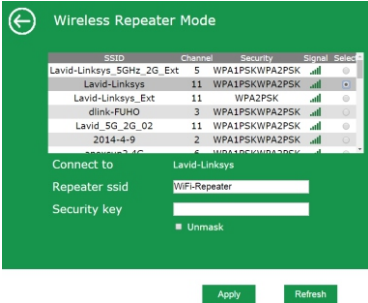

b. Launch a web browser and type <http://myrepeater.net> or <http://192.168.10.1> in the address field. Enter admin (all lowercase) for both Username and Password, then click **Submit**.

c. After logging in, you will see the web page below: Click on **"Repeater"** to continue.

d. Select your Wireless router's Network, Either keep the default SSID or customize it for extended network and insert the key of your network.

Note: The default Repeater ssid is set to be xxx_ext(xxx indicates host Router's SSID) and the Security Key is the same as your host Router's WiFi key.
Click on **"Apply"** button, The Wi-Fi Repeater will restart. After the reboot has been completed, the Wi-Fi Repeater is accessible under the SSID and the Wireless key.

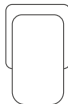

TIP

If there is no internet connection when the Powerline Adapter configuration is complete. Please disconnect the Ethernet (wired) connection from your computer to the Powerline Adapter, then reconnect the Ethernet (wired) connection from your computer to the Powerline Adapter or reconnect the WiFi of the Repeater.

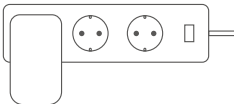

Attention

Plug powerline devices into wall outlets. Do not use power strips after setup.

 Wall Outlet

 Power Strip

Frequently Asked Questions

- Q1. Why doesn't the login page appear after entering <http://myrepeater.net>?**
- If your computer is wirelessly connected, please verify that you have connected to the Repeater's SSID.
 - If your computer is connected via an Ethernet cable, please verify that the connection is stable.
 - Make sure your computer is set to obtain an IP address automatically.
 - Use the IP address to log in to the page. The default IP is 192.168.1.254. If the Repeater is connected to the host router, please go to the router's DHCP client list to obtain the Repeater's current IP address.
 - Please reset the Repeater and try again.
- Q2. How do I reset my Powerline Adapter to factory default settings?**
- With the Powerline Adapter plugged into an electrical outlet, press and hold the Reset button 8 second, the SYS LED will turn off, When the LEDs turn back on, the reset process is complete.

- Q3. What should I do if there is no internet connection in my powerline network?**
- Make sure all powerline adapters and extenders are on the same electrical circuit.
 - Make sure the Powerline LEDs are lit on all of your powerline devices. If they are not, pair all devices again.
 - Make sure all devices are correctly and securely connected.
 - Check if you have an internet connection by connecting the computer directly to the modem or router.
- Q4. What should I do if a successfully-paired Repeater does not reconnect after it is relocated?**
- Make sure all powerline adapters and extenders are on the same electrical circuit.
 - Try to pair the Repeater again, and make sure the Powerline LED is on.
 - Check for possible interference due to a washing machine, air conditioner or other household appliance that may be too close to one of the powerline devices. Plug the appliance into the integrated electrical socket to remove the electrical noise if your powerline device has an integrated electrical socket.
